our approach

We offer our customers the widest possible range of products and services – with a personal touch.

eurochange, part of the FX Corporation group, is independent. Unlike many of our competitors, we are not tied to certain branded products allowing us to offer the widest possible range of products and services, while our size brings us considerable buying power resulting in rates that are always competitive.

As we have grown we have held onto the personal touch, which international giants within the industry cannot match.

Foreign exchange has been our core business for more than 35 years, so we have the expertise to offer a range of products and services to suit all foreign exchange requirements.

International Payments

We arrange electronic payments and international bank drafts all over the world, drawn in their respective countries, making encashment simple and reducing both clearing time and costs.

Forward Contracts

We assist corporations in meeting future foreign exchange liabilities both cost-effectively and efficiently.

Forward contracts guarantee the exchange rate you will receive when your liabilities become due, eliminating the uncertainty of future fluctuations.

Travel Money - Online and In Store

Wherever you're going, we have what you need. We always have a vast range of currencies always in stock; we buy and sell up to 80 currencies in the majority of denominations, making us a leading specialist in foreign exchange.

Our bureaux stock a large range of the most popular currencies meaning that you can get the currency you need, when you need it.
